COMPANY PROFILE - CONSTRUCTION INDUSTRY

INTRODUCTION

WorldPro was established in 1991.
WorldPro identified the need for a professional approach to procurement of building materials and finished goods to complete projects on time and within budget, whilst not compromising on the quality of the items specified by the professional team.
Whilst market conditions very often change, particularly in the construction industry, ***WorldPro*** also identified the need for a professional approach to the management and control of overhead costs in companies where margins have recently been compromised. ***WorldPro*** have aggressively addressed this area of procurement with huge success.

PROCUREMENT SERVICE

- Our core business is the professional sourcing and procurement of goods and services on behalf of clients, predominantly in the construction industry.
- In addition to the cost of materials that are specified, shipping costs, insurance and delivery are critical to the successful completion and handover of a project to a client.
- All discounts and volume credits are passed on to the client.
- Reporting on the status of items being manufactured, currently being shipped and dates of delivery, are updated daily and reported on a monthly or weekly basis, depending on the projects requirements.
- Cash Flow is an important factor with the purchase of building materials and favourable payment terms are negotiated on behalf of the client.

WorldPro provides the following services – Sourcing, Purchasing, Logistics, Insurance and Installation of Building Materials, Sanitary Ware, Floor Coverings, Furniture, Fixtures, Operating Supplies and Equipment for:

- Office Park Developments
- Game Lodges
- Apartment Blocks
- Event Management
- Hotels & Resorts
- Appointment of Outsourced Services
- Mining Industry
- Shopping Centres
- Refurbishments
- Infrastructure Developments

VENDOR SURVEILLANCE

This service aims to control, at the premises of the manufacturer or sub-contractor, the quality of workmanship and conformity of the manufactured products with the purchase specifications, the applicable drawings, codes, standards and other relevant contractual documents.

WorldPro through its strategic partners, provide vendor inspection services conducted by qualified Inspectors and Engineers on a worldwide basis. The level of ***WorldPro*** involvement will be identified in an Inspection and Test Plan and depends on the equipment and application. It may include stage inspections, witness testing or final inspection in accordance with the client's requirements. The inspections may include:
Pre-production inspection of raw materials.
In-work inspections, to check quality levels are being maintained during production.
General QC checks prior to transit, to ensure the consignment meets with specification and / or conforms with Letters of Credit.
Inspection of delivered consignments at buyer's premises to verify goods conform to pre-sealed samples or pre-defined quality levels.
Third party verification of delivered consignments.
Inspection to sort any 'good' from 'bad'.
WorldPro and its strategic partners, have a unique international network examining goods all over the world. A typical inspection might involve visual examinations or measurements to establish compliance with referenced sealed samples, a pre-defined specification or standard regulation. Consignments may be inspected for defects and damage and/or sampled and tested in the laboratory for specific performance characteristics.

CONCLUSION

WorldPro has the knowledge, experience and passion to partner the professional team to deliver the project on time, at the best possible price, without compromising on quality. We pride ourselves on our client interaction and communication at senior level. Our range of professional services is designed to integrate with all the consultants and contractors, to deliver a world-class service.
